Summary

I am a PhD student of 3.5 years at the University of Hertfordshire specialising in Bayesian statistical analysis on big data. My main interests are reverberation mapping and the interface between star-forming galaxies and AGN. I have worked with a diverse range of data including the latest releases from the LOFAR, SDSS, and H-ATLAS surveys and the Horizon-AGN simulations. My latest work combines the use of novel statistical Bayesian analysis with these large datasets in order to facilitate effective exploitation of the next generation of surveys.

| Oct 2015 – Present | Ph.D. student
Supervisor: Dr Daniel J.B. Smith
Thesis: Measuring the Physical Properties of Distant Galaxies and Black Holes in the Era of Surveys <ul style="list-style-type: none">Studying the relation between the star-formation rate and radio luminosity of galaxies.Using new photometric time-series techniques to estimate quasar black-hole masses using reverberation mapping.Innovating new Bayesian methods to infer complete distributions from incomplete, noisy data in order to mitigate observational bias and explore large datasets. | University of Hertfordshire |
| Jun 2016 | Observing <ul style="list-style-type: none">Taught students Python and Matlab for scientific programming courses.Assisted students with programming exercises.Lead programming lectures and demonstrations. | William Herschel Telescope, La Palma |
| Jan 2016 – Present | Programming teaching assistant & tutor <ul style="list-style-type: none">Taught students Python and Matlab for scientific programming courses.Assisted students with programming exercises.Lead programming lectures and demonstrations. | University of Hertfordshire, UK |
| Nov 2016 – Mar 2017 | 'Physics of stars' demonstrator <ul style="list-style-type: none">Assisted students at the Bayfordbury teaching observatory.Instructed in the use of 16-inch telescopes and the reduction of data.Projects included PNe imaging and constructing open cluster HR-diagrams. | University of Hertfordshire, UK |
| Jul 2014 – Jul 2015 | Insight Analyst
Processing big data from raw consumer search patterns to an explanatory format suitable for client business strategies. <ul style="list-style-type: none">Big data processing with Python & sci-kit learnCommunication with the backend teamAPI design, visualisation, and automation development. | Linkdex, UK |
| Jun 2013 – Aug 2013 | Summer Student
Supervisor: Dr Alastair Sinclair <ul style="list-style-type: none">Worked with the Time & Frequency Team.Analysed Gaussian beam quality for the strontium ion optical clock group.Developed analytical Matlab code and the optical bench setup required. | National Physical Laboratory, UK |

Research Interests

- Star-formation:** LOFAR, FIR, empirical relations, FIRC, MagPhys, SFG-AGN interface.
- Reverberation mapping:** High redshift, photometric techniques, $t_{lag} - L_{5100}$, selection biases.
- Big data & Bayesian analysis:** Large surveys, advanced Bayesian statistical inference, bias mitigation.
