Summary

I am a postdoctoral researcher specialising in Bayesian statistical analysis on big data, working in WEAVE-LOFAR. My main interests are reverberation mapping and the interface between star-forming galaxies and AGN. I have worked with a diverse range of data including the latest releases from the LOFAR, SDSS, HST, WISE, and H-ATLAS surveys as well as the Horizon-AGN simulations. My latest work combines the use of novel statistical Bayesian analysis with these large datasets in order to facilitate effective exploitation of the next generation of surveys.

Research Interests

- **Star-formation:** LOFAR, FIR, empirical relations, FIRC, MagPhys, SFG-AGN interface.
- **Reverberation mapping:** High redshift, photometric techniques, $t_{lag} - L_{5100}$, selection biases.
- **Big data & Bayesian analysis:** Large surveys, advanced Bayesian statistical inference, bias mitigation.

Experience

Jul 2020 – Present	Postdoc WEAVE-LOFAR QAG & galaxy evolution	University of Nottingham
	<ul style="list-style-type: none">• Plan and conduct independent research using the WEAVE data• Develop WEAVE MOS spectroscopic analysis software• Leading the Quality Assurance Group (QAG) of WEAVE-LOFAR data	
Oct 2019 – Jun 2020	Postdoc Galaxy shape measures in Euclid	Osservatorio Astronomico di Roma - INAF
	<ul style="list-style-type: none">• Quantifying the colour-gradient bias in Euclid weak-lensing measurements• Generation of realistic galaxy catalogues• Hubble image reduction	
Oct 2015 – Oct 2019	Ph.D. Supervisor: Dr Daniel J.B. Smith Thesis: Measuring the Physical Properties of Distant Galaxies and Black Holes in the Era of Surveys	University of Hertfordshire
	<ul style="list-style-type: none">• Studying the relation between the star-formation rate and radio luminosity of galaxies.• Using new photometric time-series techniques to estimate quasar black-hole masses with reverberation mapping.• Innovating new Bayesian methods to infer complete distributions from incomplete, noisy data in order to mitigate observational bias and explore large datasets.	
Jun 2016	Observing	William Herschel Telescope, La Palma
Jan 2016 – Present	Programming teaching assistant & tutor	University of Hertfordshire, UK
	<ul style="list-style-type: none">• Taught students Python and Matlab for scientific programming courses.• Ran code review sessions for post-graduates and Ph.D. students.• Lead programming lectures and demonstrations.	
Nov 2016 – Mar 2017	'Physics of stars' demonstrator	University of Hertfordshire, UK
	<ul style="list-style-type: none">• Assisted students at the Bayfordbury teaching observatory.• Instructed in the use of 16-inch telescopes and the reduction of data.• Projects included PNe imaging and constructing open cluster HR-diagrams.	

Other Experience

Jun 2013 – Aug 2013	Summer Student Supervisor: Dr Alastair Sinclair <ul style="list-style-type: none">• Worked with the Time & Frequency Team.• Analysed Gaussian beam quality for the strontium ion optical clock group.• Developed analytical Matlab code and the optical bench setup required.	National Physical Laboratory, UK
Jul 2014 – Jul 2015	Insight Analyst Processing big data from raw consumer search patterns to an explanative format suitable for client business strategies. <ul style="list-style-type: none">• Big data processing with Python & sci-kit learn• Communication with the backend team• API design, visualisation, and automation development.	Linkdex, UK

Presentations

April 2018	European Week of Astronomy and Space Science University of Liverpool, UK	European Astronomical Society, <i>EAS</i> poster
July 2017	National Astronomy Meeting University of Hull, UK	Royal Astronomical Society, <i>RAS</i> contributed talk
June 2016	National Astronomy Meeting University of Nottingham, UK	Royal Astronomical Society, <i>RAS</i> contributed talk, poster
May 2016	The Cosmic FIR Landscape with H-ATLAS University of Lisbon, Portugal	H-ATLAS consortium contributed talk
