Summary

I am a PhD student of 3.5 years at the University of Hertfordshire specialising in Bayesian statistical analysis on big data. My main interests are reverberation mapping and the interface between star-forming galaxies and AGN. I have worked with a diverse range of data including the latest releases from the LOFAR, SDSS, and H-ATLAS surveys and the Horizon-AGN simulations. My latest work combines the use of novel statistical Bayesian analysis with these large datasets in order to facilitate effective exploitation of the next generation of surveys.

Experience

|---------------------|--|--------------------------------------|
| Oct 2015 - Present | Ph.D. student | University of Hertfordshire |
| | Supervisor: Dr Daniel J.B. Smith | |
| | Thesis: Measuring the Physical Properties of Distant Galaxies and Black Holes in the Era of Surveys | |
| | <ul style="list-style-type: none">• Studying the relation between the star-formation rate and radio luminosity of galaxies.• Using new photometric time-series techniques to estimate quasar black-hole masses using reverberation mapping.• Innovating new Bayesian methods to infer complete distributions from incomplete, noisy data in order to mitigate observational bias and explore large datasets. | |
| Jun 2016 - | Observing | William Herschel Telescope, La Palma |
| Jan 2016 - Present | Programming teaching assistant & tutor | University of Hertfordshire, UK |
| | <ul style="list-style-type: none">• Taught students Python and Matlab for scientific programming courses.• Assisted students with programming exercises.• Lead programming lectures and demonstrations. | |
| Nov 2016 - Mar 2017 | 'Physics of stars' demonstrator | University of Hertfordshire, UK |
| | <ul style="list-style-type: none">• Assisted students at the Bayfordbury teaching observatory.• Instructed in the use of 16-inch telescopes and the reduction of data.• Projects included PNe imaging and constructing open cluster HR-diagrams. | |
| Jul 2014 - Jul 2015 | Insight Analyst | Linkdex, UK |
| | Processing big data from raw consumer search patterns to an explanatory format suitable for client business strategies. | |
| | <ul style="list-style-type: none">• Big data processing with Python & sci-kit learn• Communication with the backend team• API design, visualisation, and automation development. | |
| Jun 2013 - Aug 2013 | Summer Student | National Physical Laboratory, UK |
| | Supervisor: Dr Alastair Sinclair | |
| | <ul style="list-style-type: none">• Worked with the Time & Frequency Team.• Analysed Gaussian beam quality for the strontium ion optical clock group.• Developed analytical Matlab code and the optical bench setup required. | |

Research Interests

- **Star-formation:** LOFAR, FIR, empirical relations, FIRC, MagPhys, SFG-AGN interface.
- **Reverberation mapping:** High redshift, photometric techniques, $t_{lag} - L_{5100}$, selection biases.
- **Big data & Bayesian analysis:** Large surveys, advanced Bayesian statistical inference, bias mitigation.
