philastrophist

Technical Skills —

Overview

Programming

Expert:

Python

Experienced:

Shell • SQL • Matlab • LATEX

Competent:

C • C++ • R • Ruby • IDL • html

Education —

Ph.D., Astronomy

University of Hertfordshire, UK 2015 - 2019 Passed viva w/ minor corrections

MPhys, Physics

Durham University, UK 2010 - 2014 2:1 with Honours

Affiliations —

Society, EAS

Fellow of the Royal Astronomical Society, *FRAS*Member of the European Astronomical

Summary

I am a postdoctoral researcher specialising in Bayesian statistical analysis on big data, working on the weak-lensing colour-gradient bias with Euclid. My main interests are reverberation mapping and the interface between star-forming galaxies and AGN. I have worked with a diverse range of data including the latest releases from the LOFAR, SDSS, and H-ATLAS surveys and the Horizon-AGN simulations. My latest work combines the use of novel statistical Bayesian analysis with these large datasets in order to facilitate effective exploitation of the next generation of surveys.

Research Interests

- Star-formation: LOFAR, FIR, empirical relations, FIRC, MagPhys, SFG-AGN interface.
- **Reverberation mapping**: High redshift, photometric techniques, $t_{lag}-L_{5100}$, selection biases.
- Big data & Bayesian analysis: Large surveys, advanced Bayesian statistical inference, bias mitigation.

Experience

Oct 2019 -

Postdoc

Osservatorio Astronomico di Roma - INAF

Present Galaxy shape measures in Euclid

- Quanitfying the colour-gradient bias in Euclid weak-lensing measurements
- · Generation of realistic galaxy catalogues
- Hubble image reduction

Oct 2015 -

- Ph.D.

University of Hertfordshire

Oct 2019 Supervisor: Dr Daniel J.B. Smith

Thesis: Measuring the Physical Properties of Distant Galaxies and Black Holes in the Era of Surveys

- Studying the relation between the star-formation rate and radio luminosity of galaxies.
- Using new photometric time-series techniques to estimate quasar black-hole masses with reverberation mapping.
- Innovating new Bayesian methods to infer complete distributions from incomplete, noisy data in order to mitigate observational bias and explore large datasets.

Jun 2016 **Observing**

William Herschel Telescope, La Palma

Jan 2016 – Present Programming teaching assistant & tutor University of Hertfordshire, UK

 Taught students Python and Matlab for scientific programming courses.

- Ran code review sessions for post-graduates and Ph.D. students.
- · Lead programming lectures and demonstrations.

Nov 2016 – Mar 2017 'Physics of stars' demonstrator

University of Hertfordshire, UK

- Assisted students at the Bayfordbury teaching observatory.
- Instructed in the use of 16-inch telescopes and the reduction of data.
- Projects included PNe imaging and constructing open cluster HRdiagrams.

Jul 2014 – Insight Analyst
Jul 2015 Processing big of

Linkdex, UK

Processing big data from raw consumer search patterns to an explanative format suitable for client business strategies.

- Big data processing with Python & sci-kit learn
- · Communication with the backend team
- API design, visualisation, and automation development.

Other Experience

Jun 2013 -Aug 2013

Summer Student

Supervisor: Dr Alastair Sinclair · Worked with the Time & Frequency Team.

- Analysed Gaussian beam quality for the strontium ion optical clock group.
- · Developed analytical Matlab code and the optical bench setup required.

Presentations

April 2018 **European Week of Astronomy and Space Science** European Astronomical Society, EAS University of Liverpool, UK

poster

National Physical Laboratory, UK

July 2017 **National Astronomy Meeting** Royal Astronomical Society, RAS

University of Hull, UK contributed talk

June 2016 National Astronomy Meeting Royal Astronomical Society, RAS

University of Nottingham, UK contributed talk, poster

May 2016 The Cosmic FIR Landscape with H-ATLAS H-ATLAS consortium

University of Lisbon, Portugal contributed talk

Publications

Published

- Galaxy morphological classification in deep-wide surveys via unsupervised machine learning Martin, G.; Kaviraj, S.; Hocking, A.; Read, S.C.; Geach, J.E. – 2020MNRAS.491.1408M
